

Biomagnetism online training, First Level.

The Biomagnetic Pair technique consists of the positioning of magnets in specific points of the body to help maintain and restore internal balance in the body, ensuring a state of well-being and general health.

This course will allow you to access the learning of the Biomagnetic Pair technique with the innovative and didactic methodology that characterize Dr. H.C. Moisés Goiz's courses, as well as a production of impeccable quality multimedia content.

Your instructor, Dr. H.C. Moisés Goiz will help you acquire all the knowledge required to create excellent bases for your practice as a biomagnetist, in such a way that the only thing that remains at the end of the course is to go out and make immediate use of what you have learned.

Duration: Two weeks.

Modality: online.

- You will have recorded lessons, available for you to play as many times as you want for three months.
- Live sessions. There will be 5 live sessions to resolve doubts according to each module.

Our program is flexible, in such a way that it allows you to take the course 100% online if your schedule is variable or to follow the calendar that we have established.

At the end, you will have to practice everything you have learned to prepare for the second level Bioenergetics course, in which you will learn to perform a scanning without the use of a magnet and complete your training in Biomagnetism.

What you will learn:

- You will learn the historical background of biomagnetism and the theory about how terrestrial magnetism influences the immune system of humans.
- You will understand the physical, chemical and biological concepts that support the Biomagnetic Pair technique.
- You will learn why organisms from different kingdoms and natural families are associated within that concept called symbiosis.
- You will understand deeply and clearly the theory of Dr. Isaac Goiz Durán regarding why our body gets sick, what mechanisms pathologies develop and how his proposal works in this regard to definitively solve these problems.
- You will learn why shortening occurs in Biomagnetic Pair scans and how they work according to magnetic polarities.
- You will learn the difference between the concepts of scanning point and biomagnetic pair and the relation between them.
- You will know the anatomy of the body from the point of view of biomagnetism.
- The pairs of the first level of biomagnetic pair, such as their relation and the microorganisms involved.
- At the end of the course you will be able to carry out a Biomagnetic Pair session of the first level points using a magnet.
